Aims

To allow the students to develop their knowledge, skills, and general expertise in relation to a project deliverable embodying technical mastery, good design practice, and self-management on a subject of their choice. The project will provide the opportunity for the students to demonstrate their ability to learn and develop their skills independently culminating in an appropriate media-related deliverable suitable for showcasing to prospective employers.

Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate a knowledge of and ability to apply design, management, and technical skills within the project.
- 2 Demonstrate to an advanced degree the ability to organise and coordinate the resources at their disposal to achieve project aims, including liaison with technical staff, lecturers and other organisations
- 3 Demonstrate their ability to produce a media-related deliverable which adheres to industry standards
- 4 Demonstrate their ability to learn new skills, acquire new knowledge, adapt current skills and knowledge and apply them to specific outcomes or problems in a self-directing mode of learning.
- 5 Have developed the skills of research, problem-solving, decision-taking during the project.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Log and time management	1	2	
Presentation and viva	3	4	
Final written report	4	5	
Media related deliverable	2	3	4

Outline Syllabus

Although there is no specific syllabus, the process of achieving a successful end to the project will be:

Development of scope, deliverables and timescale.

Identification and discussion with supervisor of the problems to be solved or opportunities to be evaluated within the time constraints of the project.

Presentation of project in final agreed format.

The student will be assessed by their academic project supervisor on their management of the project. This will be based on the upkeep and timely submission of a project log based on adherence to the deliverables cited in the Gantt and minutes of meetings with supervisors to discuss progress and problems/solutions encountered. A minimum number of meetings is expected.

Learning Activities

Project work; lectures on project support topics; supervision tutorials

Notes

The Project is intended to be the embodiment of all components of the course, bringing together theoretical and conceptual aspects into the management of a media project in a realistic technical/commercial .
