Introduction to the Dissertation - The selection of a Research Topic and formulation of a research question.- Establishing a research aim and setting / tailoring objectives to fulfil that goal- The structure and purpose of a dissertation2. Research Approaches and Strategies- The Inductive versus Deductive Approach- Qualitative and Quantitative Research- Data Collection Strategies - Laboratory work- The Knowledge Database. Effective Literature Searching and Literature Reviews3. Data Collection and Analysis - Data Collection Tools - Qualitative and Quantitative Data Analysis - Data Analysis tools
Module Overview	This module enables you to complete a substantial piece of individual work and build on your expertise in your degree specialism. The module develops your practical research skills and enhances your knowledge and expertise in your degree specialism. As the completion of a dissertation is principally student-led the module offers the opportunity to further develop time management, presentation and communication skills.
Additional Information	The dissertation enables students to personally select, and complete an in-depth study on, a topic related to their degree specialism. The module develops students' practical research skills and enhances their knowledge and expertise in their degree specialism. As the completion of a dissertation is principally student-led the module offers the opportunity to further develop time management, presentation and communication skills.Where this module is part of a Degree Apprenticeship programme, the knowledge learning outcomes are K4
