Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Test	AS1	Online Test	50	
Report	AS2	Strategic Planning Report	50	

Aims

Critically apply understanding of how knowledge and information management can be used effectively within facilities management services

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically evaluate the importance of positioning, directing and implementing facilities management at a strategic business level
- 2 Analyse the purpose and role of facilities management governance to all stakeholders within an organisation, and its relationship to risk management
- 3 Evaluate the factors that impact on workforce planning in relation to organisational plans and objectives

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

TEST	1	2	3
REPORT	1	2	3

Outline Syllabus

- *Operational and strategic facilities management*
- *Management theory and concepts*
- *Innovation and innovation management*
- *Professional practice and ethical responsibilities*
- *Corporate governance and risk*
- *Business continuity planning*
- *Strategic Human resource management*

Learning Activities

Lectures are used in order to identify and explain key concepts and theories and provide detailed information on particular subject areas within the module. They help to stimulate the student's interest in the subject area. Lectures may also include guest industry speakers to add industry context to the material.

Workshops are used to engage students in more intensive discussion and activity on particular subject areas within the module. This helps shape the student's own understanding and place the lecture material in context.

Notes

This module is critical to understanding the professional and ethical responsibilities of facilities managers in order to strategically plan facilities management operations and services.
