

Liverpool John Moores University

Title: BUILDING ENGINEERING RESEARCH PROJECT
Status: Definitive
Code: **6226BEUG** (122833)
Version Start Date: 01-08-2021

Owning School/Faculty: Civil Engineering and Built Environment
Teaching School/Faculty: Civil Engineering and Built Environment

Team	Leader
Muhammad Waseem Ahmad	Y
Badr Abdullah	
Jeff Cullen	
Laurence Brady	

Academic Level: FHEQ6 **Credit Value:** 40 **Total Delivered Hours:** 40
Total Learning Hours: 400 **Private Study:** 360

Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Lecture	20
Tutorial	20

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Dissertation	AS3	Final dissertation report	90	
Presentation	AS2	Presentation of proposal, reading to date and initial findings	10	

Aims

To enable students to complete a substantial piece of individual work and build on their expertise in a Building Engineering subject.

To develop students' research, time management, presentation and written communication skills.

Learning Outcomes

After completing the module the student should be able to:

- 1 Identify a research question, problem or hypothesis and establish aims and objectives to support the investigation.
- 2 Collate, and appraise existing knowledge in an Engineering field relevant to your programme and present a critical evaluation in the form of a literature review.
- 3 Develop and refine a research and data collection strategy appropriate to the research question / problem posed.
- 4 Source, collect, and analyse relevant and original qualitative and / or quantitative data.
- 5 Conduct an appropriate practical and/or laboratory programme to validate theoretical research.
- 6 Synthesise, analyse and critically evaluate the research findings using reasoned and logical arguments within a structured written framework and communicate the outcomes and methodology of research verbally and in written form.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Final dissertation report	2	3	4	5	6
Presentation of proposal	1	6			

Outline Syllabus

Introduction to the Dissertation:

The selection of a Research Topic and formulation of a research question.

Establishing a research aim and setting / tailoring objectives to fulfil that goal

The structure and purpose of a dissertation

Research Approaches and Strategies

The Inductive versus Deductive Approach

Qualitative and Quantitative Research

Data Collection Strategies (Interviews, Field Tests, Lab Tests, Surveys, Questionnaires, Case Studies)

The Knowledge Database. Effective Literature Searching and Literature Reviews

Data Collection and Analysis

Data Collection Tools including Bristol on-line surveys

Qualitative and Quantitative Data Analysis

Data Analysis tools including SPSS and NVivo

Learning Activities

Individual study and investigation. Supported by nominated Supervisor; lectures; workshops.

Notes

The dissertation enables students to personally select, and complete an in-depth study on, a topic related to Building Engineering. The module develops students' practical research skills and enhances their knowledge and expertise in Building Engineering. As the completion of a dissertation is principally student-led the module offers the opportunity to further develop time management, presentation and communication skills.
