Portfolio	AS1	PORTFOLIO	100	

Aims

This module aims to critically evaluate and reflect on the knowledge, skills and

behaviours that have been developed throughout the programme of study and the workplace via a project related case study.

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically analyse and apply built environment principles and techniques to a complex work based project.
- 2 Contribute to the presentation of proposals in report format and using visuals.
- 3 Reflect upon their learning, performance and or achievement and to plan for their personal, educational and career development linked to the relevant PSRB requirements.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

PORTFOLIO	1	2	3
-----------	---	---	---

Outline Syllabus

This module will facilitate the learning process by enabling students to apply previously gained knowledge and theory in a practical context through the workplace. This will be supported by workshops where students will be able to collectively discuss their experiences and progress on the knowledge, skills and behaviours required for their relevant professional body. The development of the work based project will be agreed with the Module Team and the relevant workplace mentor/counsellor. Regular meetings will take place with the workplace mentor/counsellor to review progress and will be discussed at the workshops with the Module Team. The following areas could be considered within the knowledge based skills such as construction technology, project management, business and commercial management, conflict avoidance and management.

Learning Activities

Workshops and work place learning

Notes

The central theme of the module is the production of a work based case study structured to capture the knowledge, skills and behaviours required by the relevant professional body. These knowledge, skills and behaviours are categorised by their level of practice and linked to their level of study.
