

Work Based Project 3

Module Information

2022.01, Approved

Summary Information

Module Code	6230BEUG
Formal Module Title	Work Based Project 3
Owning School	Civil Engineering and Built Environment
Career	Undergraduate
Credits	10
Academic level	FHEQ Level 6
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Civil Engineering and Built Environment

Learning Methods

Learning Method Type	Hours
Off Site	4
Workshop	5

JAN-CTY	CTY	January	12 Weeks

Aims and Outcomes

Aims	This module aims to critically evaluate and reflect on the knowledge, skills and behaviours that have been developed throughout the programme of study and the workplace via a project related case study.
------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Critically analyse and apply built environment principles and techniques to a complex work based project.
MLO2	2	Contribute to the presentation of proposals in report format and using visuals.
MLO3	3	Reflect upon their learning, performance and or achievement and to plan for their personal, educational and career development linked to the relevant PSRB requirements.

Module Content

Outline Syllabus	This module will facilitate the learning process by enabling students to apply previously gained knowledge and theory in a practical context through the workplace. This will be supported by workshops where students will be able to collectively discuss their experiences and progress on the knowledge, skills and behaviours required for their relevant professional body. The development of the work based project will be agreed with the Module Team and the relevant workplace mentor/counsellor. Regular meetings will take place with the workplace mentor/counsellor to review progress and will be discussed at the workshops with the Module Team. The following areas could be considered within the knowledge based skills such as construction technology, project management, business and commercial management, conflict avoidance and management.
Module Overview	This module aims to enable you to critically evaluate and reflect on the knowledge, skills and behaviours that have been developed throughout the programme of study and the workplace via a project related case study. The central theme of the module is the production of a work based case study structured to capture the knowledge, skills and behaviours required by the relevant professional body. These knowledges, skills and behaviours are categorised by your level of practice and linked to your level of study.
Additional Information	The central theme of the module is the production of a work based case study structured to capture the knowledge, skills and behaviours required by the relevant professional body. These knowledge, skills and behaviours are categorised by their level of practice and linked to their level of study. On the Real Estate Degree Apprenticeship programme, the knowledge learning outcomes are K18, the behaviours learning outcomes are B1, B2, B3, B5 and the skills learning outcomes are S1, S2, S3, S4, S5, S12, S13, S14. On the Building Surveying Degree Apprenticeship programme, the knowledge learning outcomes are K12, the behaviours learning outcomes are B1, B2, B3, B5 and the skills learning outcomes are S1, S3, S4, S5. On the Quantity Surveying Degree Apprenticeship programme, the knowledge learning outcomes are K13, K14, K15, the behaviours learning outcomes are B1, B2, B3, B4, B5 and the skills learning outcomes are S3, S4, S5, S9. On the Construction Management Degree Apprenticeship programme, the knowledge learning outcomes are K13, K14, K15 the behaviours learning outcomes are B1, B2, B3, B5 and the skills learning outcomes are S3, S5, S9, S10, S11.
