

Liverpool John Moores University

Title: ENGINEERING MEASUREMENT
Status: Definitive
Code: **6503ICBTQS** (127108)
Version Start Date: 01-08-2021

Owning School/Faculty: Civil Engineering and Built Environment
Teaching School/Faculty: ICBT, Colombo

Team	Leader
Mohan Siriwardena	Y

Academic Level: FHEQ6 **Credit Value:** 20 **Total Delivered Hours:** 40
Total Learning Hours: 200 **Private Study:** 160

Delivery Options

Course typically offered: S1 and Non Std S2 (S2 for Jan)

Component	Contact Hours
Workshop	40

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Report	AS1	MEASUREMENT REPORT	50	
Report	AS2	TECHNICAL REPORT	50	

Aims

This module consolidates and builds upon the student's learning to date in the fields of measurement and BIM technologies and processes. Students will examine the most effective quantification techniques for complex construction and engineering projects through analysis of and comparison between available measurement protocols.

Learning Outcomes

After completing the module the student should be able to:

- 1 Appraise and apply the rules of the standard method of measurement to prepare project documentation related to complex construction and civil engineering projects.
- 2 Evaluate emerging practices of the Quantity Surveyor in relation to sustainable design, and environmental and performance considerations.
- 3 Critically evaluate the BIM protocols, processes and software appropriate to the role of the Quantity Surveyor/Estimator working in a collaborative environment throughout the project life cycle.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

MEASUREMENT REPORT	1	3
TECHNICAL REPORT	2	3

Outline Syllabus

Design economics

Cost planning

Benchmarking

Value engineering

Large scale and high rise construction projects measurement.

Civil engineering measurement

Tender documentation for a variety of different procurement options.

BIM Processes

Application and evaluation of BIM software applicable to the role of the Quantity Surveyor/ Estimator.

Development of contract practice skills in relation to pre and post contract management

Learning Activities

This module will be delivered as a distance learning package. All of the materials required to enable students to develop knowledge and apply this knowledge to achieve the learning outcomes via the assessments, will be provided either in hard copy or electronically on Canvas. On an allocated date for each cohort, a series of workshops will be help to support students in their studies.

Notes

This module will provide students with an understanding of BIM as it relates to the QS and engineering measurement.
