Outline Syllabus

Recognising the Creative and Innovative Opportunity
Creating an innovation and change business environment
Managing innovation and change
The Innovation imperative
Stages and strategic processes for creativity
Creating Value through innovation and technology
Identification of new technologies for innovation
Managing creativity and change through business Informatics
Developing innovative solutions for business challenges
Developing New Products and Services

Learning Activities

This module will employ a range of student-centred learning activities including lecture, workshops, group discussion and seminars to explore and analyse innovative approaches to contemporary business problems. Business cases and examples are going to be engaged to lead the student towards a case-based problem solving

Notes

This module is intended to teach the student how to not just think creatively, but how to manage innovative ideas throughout the organisational framework. Innovation will be introduced as a way of providing value added to the corporate products and services, if managed appropriately. By application, through seminars and workshops, creative application of innovative ideas to existing business processes, will enable the student to become aware of the power that creativity and innovation can bring to contemporary business environment and the organisation
