Academic Level:	FHEQ6	Credit Value:	20	Total Delivered Hours:	30
Total Learning Hours:	200	Private Study:	170		

Delivery Options

Course typically offered: Semester 2

Component	Contact Hours
Lecture	27
Online	3

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	Case study	4500 word essay	100	

Aims

To provide the student with the foundations and underpinning knowledge of how to holistically care for the critically ill patient.

Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate an in-depth knowledge of normal and disordered physiology
- 2 Critically examine the evidence base for critical care nursing practice
- 3 Apply knowledge of holistic care to develop best practice within the critical care environment.
- 4 Demonstrate a systematic approach to assessment and examination of the critically ill patient

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Case Study	1	2	3	4
------------	---	---	---	---

Outline Syllabus

Anatomy, physiology and pathophysiology of major systems, pharmacology and pharmacokinetics, critical care treatment interventions, ethical and legal issues, leadership and management.

Learning Activities

A range of learning activities will be used for module delivery including lectures, seminars, workshops, web based activities, reflective practice, formative assessment, guided reading and independent study.

Notes

This module will provide the foundation knowledge in relation to critical care nursing and practice. This will develop the student towards being a critical care practitioner, with innovative skills and associated background knowledge to support the care of the critically ill patient.

This module is supported by a virtual learning environment
