Aims and Outcomes

Aims	To provide students with the skills necessary to identify and demonstrate awareness of contemporary issues in management of business operations.
------	--

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Discuss critically the field of operational management.
MLO2	2	Demonstrate effectively the ability to appraise the processes and concepts in operational management.
MLO3	3	Effectively apply secondary and primary data, and comprehensively compare managerial issues in planning, organizing, leading and controlling throughout different organizations.

Module Content

Outline Syllabus	Planning and Decision Making Planning Organizational Change Innovation and Change Issues in Global Management Adaptive Organizations Managing Human Resource Systems Leadership and Motivation Management and Communication
Module Overview	
Additional Information	Formal lectures will be supported by student group works which will be supervised by lecturers. Small group work projects will be carried out and presented to the course. Breakout rooms and individual support by the lecturing team help to create solutions to the case studies related to operational management. One of the case studies will be designed as evolving case during the actual period of lecture series. Students then have to deal with a changing environment which requires operational decisions alongside of the module.
