Sri Lanka Institute of Information Technology

## Learning Methods

Learning Method Type	Hours
Lecture	11
Seminar	11
Workshop	22

## Module Offering(s)

Offering Code	Location	Start Month	Duration
JAN-PAR	PAR	January	12 Weeks

## Aims and Outcomes

<b>Aims</b>	Climate change presents one of the most significant challenges to businesses today. However by taking action businesses can also reap significant rewards through redesigning products, processes and their business models. This module aims to enable students to understand environmental issues facing businesses; what actions businesses can take to identify, measure and reduce their negative impacts on the environment and how a low carbon society can create new opportunities to businesses.
-------------	--

## Learning Outcomes

After completing the module the student should be able to:

Code	Description
MLO1	Identify and understand the environmental issues and laws facing businesses today
MLO2	Critically evaluate and understand how to use a range of tools and techniques to measure a business' environmental impacts and performance
MLO3	Identify and critically evaluate how a business can improve its environmental performance
MLO4	Critically evaluate how new business opportunities can be created for a low carbon society

## Module Content

### Outline Syllabus

Understanding environmental issues facing businesses  
Identify environmental laws that impact various businesses  
Evaluating the environmental impacts of a business  
Environmental management systems  
Improving environmental performance  
Creating new business opportunities through environmental improvements to products, processes and business models  
Measuring environmental performance  
Reporting and communicating environmental performance

## Module Overview

### Additional Information

This module introduces students to the issues businesses face in identifying, measuring and reducing their negative impacts on the environment. It also focuses on how businesses can create new opportunities through resigning their produces, processes and business models for a low carbon society.
