

Liverpool John Moores University

Title: RESEARCH PROJECT IN PHARMACY AND PHARMACEUTICAL SCIENCE
Status: Definitive
Code: **7000PDPHAR** (113114)
Version Start Date: 01-08-2013

Owning School/Faculty: Pharmacy & Biomolecular Sciences
Teaching School/Faculty: Pharmacy & Biomolecular Sciences

Team	Leader
Mark Cronin	Y
Philip Denton	

Academic Level: FHEQ7
Credit Value: 40.00
Total Delivered Hours: 172.00
Total Learning Hours: 400
Private Study: 228

Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Lecture	1.000
Online	3.000
Practical	140.000
Seminar	3.000
Tutorial	25.000

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	AS1	Research Project Protocol	15.0	
Dissertation	AS2	Performance on project work and preparation of final report and abstract	70.0	
Presentation	AS3	Presentation of a seminar or poster	15.0	

Aims

To enable the student to design, initiate and complete a research project in any area of pharmaceutical science or practice

Learning Outcomes

After completing the module the student should be able to:

- 1 Locate and critically evaluate appropriate scientific literature
- 2 Design a protocol for a specific research project
- 3 Select the relevant statistics for a specific purpose
- 4 Design and perform experiments
- 5 Demonstrate competence in objective observation, data analysis and summarising data succinctly
- 6 Demonstrate proficiency in the production of clear and concise written report of the research
- 7 Demonstrate proficiency in the production and presentation of a seminar or poster of the research, suitable for presentation at a conference

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Project Protocol	1	2	3		
Project Report	1	3	4	5	6
Project Poster or Seminar	7				

Outline Syllabus

Project work, including investigative work and data analysis. Introduction to the module.

Learning Activities

Education in the research ethos. Developing a plan for a research project. Further development of literature searching and review skills. Time management. Data collection and analysis. Written and verbal reporting of research findings.
