Notes

A report which evaluates a plan for improving Multi Agency Working area working – this plan can either be a published one or one prepared by the student. This report should be a 3,000 word reflection on the plan, making use of academic research and government literature. It should be focused on the theme of making sense of the relationship of the theory and the practice of MAW and partnership – There should be an equal balance between academic and government literature. The tone of this reflection should be probing, thoughtful and concerned with evidence.
