

Complications of Diabetes

Module Information

2022.01, Approved

Summary Information

Module Code	7001DBTADV
Formal Module Title	Complications of Diabetes
Owning School	Nursing and Allied Health
Career	Postgraduate Taught
Credits	20
Academic level	FHEQ Level 7
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Nursing and Allied Health

Learning Methods

Learning Method Type	Hours
Lecture	10
Practical	20
Tutorial	10

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
APR-CTY	CTY	April	12 Weeks

Aims and Outcomes

Aims	To enrich the Advanced Practitioner's knowledge of the pathophysiology, treatment and prevention of the microvascular and macrovascular complications associated with diabetes.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Critically consider the risk factors for the macrovascular and microvascular complications associated with diabetes
MLO2	2	Explore the screening, prevention and treatment of the macrovascular and microvascular complications associated with diabetes
MLO3	3	Analyse service provision for patients with diabetes related complications.

Module Content

Outline Syllabus	Pathogenesis of each of the microvascular complications (retinopathy, nephropathy and neuropathy). Pathogenesis and risks of macrovascular complications (CVD, IHD, PAD), NICE guidance for treatment of complications. Risk factors for developing complications (inc. HbA1c, duration diabetes, BP, lipids). Importance of education and self management, psychosocial impact of complications. Referral pathways and services available.
