Notes

MGTMEM002 Project Management requires project management knowledge, transferable skills, such as presenting, and the ability to use project management tools, such as MSProject. The coursework will include a group submission involving the simulation of a project team, with students working together to plan and define a project of their choice, which has been agreed by the tutor. Project teams are required to present their findings to tutors from the module team. Formative feedback will be provided on this piece of work before the submission of the final part of the coursework which is assessed as an individual's piece of work.
