Aims

The module enables students to become familiar with a range of qualitative research methods and to understand the strengths and weaknesses of qualitative approaches.

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically appraise a range of different methods of data collection that belong to the qualitative research tradition
- 2 Evaluate how these approaches offer different perspectives according to the focus of the research
- 3 Identify and evaluate the advantages and disadvantages of the various qualitative data collection methods and discuss access and ethical issues involved
- 4 Discuss the different approaches to the analysis of qualitative data and identify criteria for qualitative research evaluation
- 5 Utilize information technology and appreciate how technology can enable data analysis

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Assignment	1	2	3	4	5
------------	---	---	---	---	---

Outline Syllabus

- *Collecting natural language data: interviews; critical incident techniques; diary methods*
- *Ethnographic approaches: research as the explicit role; interrupted involvement; choice of roles; case study research*
- *Understanding through interaction: photographs and visual metaphors; action research*
- *Analyzing transcripts: content analysis; grounded analysis*
- *Discourse analysis: narrative analysis; conversation analysis; argument analysis*
- *Using computers and software to analyse qualitative data*
