Academic Level: FHEQ7 **Credit Value:** 60 **Total Delivered Hours:** 12
Total Learning Hours: 600 **Private Study:** 588

Delivery Options

Course typically offered: Semester 2 and Summer

Component	Contact Hours
Tutorial	12

Grading Basis: 50 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Dissertation	diss	16,000 word research project	100	

Aims

To prepare a research project that applies managerial concepts and research techniques to a technology related organisational issue or problem.

Learning Outcomes

After completing the module the student should be able to:

- 1 Engage in critical reasoning to provide a convincing justification of the importance of the research topic.
- 2 Select, synthesise and critically evaluate a wide range of literature relevant to the issue under investigation.
- 3 Systematically collect and analyse appropriate data to answer a unique research question or questions.
- 4 Utilise critical and system thinking to draw logical conclusions from, and discuss realistic implications and limitations of research findings.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

16,000 word research project	1	2	3	4
------------------------------	---	---	---	---

Outline Syllabus

Working in conjunction with the supervisor the student will refine the precise topic for research. Building on the preparatory modules, Managing Business Research 1 and Managing Business Research 2, students will develop their critical skills as a researcher.

Workshops and online tutorials include:

organising a project

the ethical approval process

working with a supervisor

writing a critical literature review

collecting and analysing qualitative and quantitative data

writing a discussion and conclusion

Learning Activities

Supervisory tutorials, scheduled workshops, online materials and tutorials, independent research.

Notes

The research project builds on previous learning from Managing Business Research 1 and 2 and from appropriate subject specific modules, with the learning outcomes being achieved through a 16,000 word dissertation that applies managerial concepts and research techniques to critically investigate a technology related organisational issue or problem.

Whilst the student will primarily operate as an independent learner for this in-depth advanced study, support and guidance will be available from the assigned

supervisor, online materials and scheduled workshops.
