Introduction to clinical examination and diagnostics
Module Overview	The aim of this module is to build on the earlier module 'Developing Practice in Adult Nursing' and consolidate your engagement engagement with knowledge, attitudes, values and skills associated with safe and effective care to support your development as an independent practitioner. By the end of the module, you will be able to practice independently with minimal supervision to achieve the proficiencies associated with NMC Professional Values (progression point 3).
Additional Information	The Academic Assessor will monitor that the student is completing their hours. This includes any practice placement learning and simulated practice learning, in accordance with the students programme plan. Please note that workshop hours as listed in the above contact hours account for simulated theoretical learning, in accordance with NMC standard 3.4
