Notes

The majority of this module involves work-based training under the guidance of a local tutor, following a prescribed schedule. The tutor and student are visited on a regular basis by the Clinical Liaison Tutor. The underpinning therapeutic knowledge that may be assessed in the OCPE is provided by the separate Therapeutics Modules.

A student will fail this assessment if by admission, through their actions or recommendations (for example, giving incorrect or mis-information, recommending inappropriately) adversely influence the level of risk or safety inherent in the treatment of patient(s).
