Aims

This module aims to build on the knowledge and skills acquired through completion

of the FCSM (portfolio and OSCE) and therapeutics modules. It will also provide students with experience of other roles of pharmacists beyond the face-to-face provision of patient care.

Learning Outcomes

After completing the module the student should be able to:

- 1 Identify individual CPD needs relevant to clinical pharmacy and plan self-directed learning (and clinical experience) to address such needs
- 2 Implement evidence based medicine and current "best practice" in the management of individual patients, whilst highlighting the gaps / limitations in the evidence base for conditions commonly encountered in practice
- 3 Demonstrate awareness of the local and national targets which impact on requirements of pharmacy services
- 4 Develop an action plan to complete agreed tasks that aim to improve medicines management for the Trust
- 5 Plan and deliver relevant education or training to healthcare professionals or patient groups

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:
