Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Report	AS1	A report detailing the management procedures put in place to control a typical modern organization. This will include the policies and check controls put in place.	100.0	

Aims

To manage information technology resources in modern organizations.

Learning Outcomes

After completing the module the student should be able to:

- 1 Analyse and specify relevant IT management issues.
- 2 Support effective informed decision making when creating network policies.
- 3 Specify implementation methods of information systems.
- 4 Control and coordinate IT resources.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

CW	1	2	3	4
----	---	---	---	---

Outline Syllabus

Network technologies

IT policies

Managing users' access to information systems

Maintaining control of resources

Managing systems implementation

IT project management

Learning Activities

The module will run as a series of half day workshops allowing for the flexible delivery of the taught elements and experiential learning into structured exercises. This allows the student to develop their conceptual and practical understanding of this key area of professional practice.
