### Aims

*To provide students with an opportunity to develop their own learning and knowledge base in a public health topic of their own choosing.*

### Learning Outcomes

After completing the module the student should be able to:

- 1 Plan, develop and present your own learning around a public health topic
- 2 Critically analyse and evaluate research evidence

### **Learning Outcomes of Assessments**

The assessment item list is assessed via the learning outcomes listed:

Report                                    1       2

### **Outline Syllabus**

*No specific syllabus - as each student will select their own area of public health to investigate.*

### **Learning Activities**

Tutorials and independent study. Could include online learning or work based activity

### **Notes**

This module provides students with an opportunity for the study of a public health topic that is suited to their own needs but which fulfills the learning outcomes for the module. This might focus on a topic related to your work. Topics addressed in the past include: Working in Partnerships to Improve Mental Health; Smoke Free Initiatives; Reviewing Research Governance Procedure

Students will enter into an individual learning agreement that will specify the learning objectives, learning activities and assessment methods for their selected area of study.
