| Seminar   | 16.000        |

**Grading Basis:** 40 %

#### **Assessment Details**

| Category | Short       | Description                                                            | Weighting | Exam     |
|----------|-------------|------------------------------------------------------------------------|-----------|----------|
|          | Description |                                                                        | (%)       | Duration |
| Essay    | AS1         | A poster presentation on an issue in the area of managing information. | 25.0      |          |
| Essay    | AS2         | A paper based upon the issue reviewed in part 1.                       | 75.0      |          |

#### **Aims**

The aims of this module are to allow the student to:

develop the ability to analyse current IS/IT issues as they relate to strategic management of an organisation;

synthesise new approaches to managing information through the use of viable

systems and other appropriate development theories; contribute to the development of information strategies; contribute to the development of risk management in corporate IS/IT; analyse current and future trends in IT/IS, so as to maximise the benefits of this fast changing environment.

Develop appropriate security and legal protection to organisation IS/IT systems.

## **Learning Outcomes**

After completing the module the student should be able to:

- Discuss the nature of information as a strategic resource and the need for a corporate information strategy linked to the business strategy.
- 2 Understanding the nature of information in a complex world, and be able to formulate strategies for recognising and creating information.
- Formulate strategies for improving and maintaining storage, retrieval, and use of information within the organisation.
- 4 Appraise and make strategic judgements about suitable information strategies to support decision making processes.
- 5 Contribute to the development and maintenance of information systems through an understanding of development methods.
- Apply current IT/IS legal requirements to policies and procedures within the organisation.
- 7 Develop improved security to IT/IS systems.

#### **Learning Outcomes of Assessments**

The assessment item list is assessed via the learning outcomes listed:

ESSAY 1 2 ESSAY 3 4 5 6 7

## **Outline Syllabus**

New challenges for managers: recognising and creating information, and appreciating why managers must manage it.

A typology of Information Systems.

Information as a strategic resource and its role in competitive advantage.

The relationship between data, information and knowledge and their management.

Decision support in context: operational, tactical and strategic levels of decision making.

Establishing information requirements.

Computer Security;

Computer Law;

Computer Ethics;

Systems Development.

# **Learning Activities**

There will be a range of activies which will include: lectures, guest speakers, student presentations and seminars, student lead discussions, work-based projects.

#### **Notes**

This module requires students to fully participate by bringing their experiences and knowledge to the topics under discussion every week. A short presentation to the group is part of the assessment and will take place during two sessions towards the end of the module. This will be based on the student's own work place or an appropriate case study presented by the student. The final assessment will normally be a continuation of this piece of work.
