Teaching School/Faculty: Built Environment

Team	Leader
Fiona Borthwick	Y
Larry Wilkinson	

Academic Level: FHEQ7 **Credit Value:** 20.00 **Total Delivered Hours:** 51.00
Total Learning Hours: 200 **Private Study:** 149

Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Lecture	24.000
Seminar	24.000

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Exam	AS1	unseen	50.0	3.00
Report	AS2	project report	50.0	

Aims

To introduce the student to aspects of project performance and then allow the student to evaluate the impact of these aspects on the success of a project.

Learning Outcomes

After completing the module the student should be able to:

- 1 Identify and evaluate all stages of a project management plan.
- 2 Critically analyse the various management systems that impact on the production aspect of a construction project.
- 3 Critically evaluate factors that affect a projects performance.
- 4 Identify and evaluate the role of 'people management' within the project.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

EXAM	2	3	4
PROJECT REPORT	1	2	

Outline Syllabus

Project Planning - whole life cycle of the project (inception to reuse).
Project environment and management systems - factors that affect performance - parties involved in the process, legislation, health and safety, environmental and sustainable issues (concentrating on the impact on production management)
Human Resource Management.

Learning Activities

Lectures and Seminars.

Notes

The module concentrates on the production aspect of the project; identifying how it interrelates with all other stages of the project, and the factors that can affect the performance of the project. It also evaluates the role of people and how they are managed and how this can affect the success of the project performance.
