Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	Assignment	2,500 words	100	

Aims

In order to run a successful business, today's manager needs to combine business skills with an understanding of information systems and the opportunities and benefits that they bring to an organisation. This module aims to provide the knowledge to develop and manage an efficient business information system and how to use information systems to achieve organisational goals.

Learning Outcomes

After completing the module the student should be able to:

1   Identify and justify a range of valid sources and synthesise suitable datasets.
2   Critically analyse data and information, abstracting meaning from information and sharing knowledge
3   Develop, manage and exploit information systems and their impact on organisations

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Critical Review   1   2   3

Outline Syllabus

Data and information
Web 2.0
Enterprise systems and ERP
Information systems in business operations

Learning Activities

Workshops, IT based activities, lectures.

Notes

This option module is in option group D, as decribed in the programme specification, and should not be combined with other modules in this group.

The module will use information technology to complement key academic and work related practice in the field of data and information systems.
