## Notes

The module will be an addition to the paramedic skill set. The advanced paramedic role in the UK is changing. Whilst variations exist nationally, this programme will explore the differences whilst offering a range of advanced skills beyond paramedic traditional practice.

The programme will be delivered a 15 week period (one semester). The time slot is 2 hours usually once a week. Please check timetable for the subjects to be taught and room number. This information will also be on the Canvas (VLE) website (for you to access).
