Presentation	pres	a case presentation	30	

Aims

The aim of the module is to enable the student to develop a critical understanding of the knowledge and skills which are required in order to effectively work as a specialist general practice nurse

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically evaluate the assessment, planning, provision & evaluation of care to meet the needs of individuals and groups in a general practice population
- 2 Appraise the assessment, diagnosis and treatment of specific diseases in accordance with agreed national and local protocols & policies in collaboration with others.
- 3 Synthesise strategies and evidence based interventions which can be used to promote the health of individuals, carers, families and groups
- 4 Justify and evaluate what is required to provide specialist nursing care to a range of patients within a practice population
- 5 Critically explore the diagnostic, health screening, health surveillance and therapeutic techniques, which meet the needs of individuals and groups within a practice population

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Learning agreement	1	2	4	5
presentation	3
