Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Portfolio	Case Study	Industry related scenario based	100.0	

Aims

To develop the requisite project management skills and knowledge necessary to manage the key processes of planning, executing, controlling and closing a project at appropriate stages in the project life cycle.

Learning Outcomes

After completing the module the student should be able to:

1	Critically review and assess the validity of organisational theory that underpins practices related to planning, executing, controlling and closing of projects.
2	Critically examine the inputs, tools and techniques and outputs to the key processes throughout the project life cycle.
3	Plan, monitor and control a complex project at its different stages.
4	Appraise and utilise project management software for planning, monitoring and reporting progress.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Portfolio Case Study   1   2   3   4
Related

Outline Syllabus

The planning, executing, monitoring and controlling processes
Developing the project management plan
Information management
Stakeholder management
Performance management
Sustainability and ethics
Project termination
Closing and post-project review
Use of project management scheduling, resource allocation and monitoring software

Learning Activities

The module is delivered in taught mode by lectures that include discussion around case studies, interactive group work and directed self-study.

Notes

The module develops students' of the key processes of planning, executing, monitoring, controlling and closing a project by providing a thorough analysis of the environment in which such processes operate.
