Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Portfolio	Work Based	Project related portfolio including 2 No. 30 minute webinar discussions to form part of the portfolio submission	100.0	

Aims

To allow students to apply the theory and concepts into a project scenario related to their own work experience and practice. Collaborative working and skills development will be analysed from an individuals perspective and the impact on the project.

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically evaluate collaborative working approaches and their influence on the success of a project.
- 2 Develop collaborative working practices on an industry project.
- 3 Critically analyse their own skills and reflect on their own personal development.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Work Based Project	1	2	3
--------------------	---	---	---

Outline Syllabus

Collaborative working practices

Skills development

Personal development

The content of the module is drawn from the core modules within the programme that will then be applied to a project scenario based on the students own working experiences.

Learning Activities

Online seminars, individual skype tutorials. Use of case studies and video's. The students will be expected to carry out two 30 minute webinars on key aspects of collaborative working within their own project.

Notes

The module develops students' practical and team skills within the context of collaborative working on an industry project.

The contact hours outlined above are indicative of online delivery and this module is only available in distance learning mode.
