

Module Information

2022.01, Approved

Summary Information

Module Code	7209CPPHAR
Formal Module Title	Oncology Pharmacy Practice in Secondary Care
Owning School	Pharmacy & Biomolecular Sciences
Career	Postgraduate Taught
Credits	20
Academic level	FHEQ Level 7
Grading Schema	50

Teaching Responsibility

LJMU Schools involved in Delivery
Pharmacy & Biomolecular Sciences

Learning Methods

Learning Method Type	Hours
Tutorial	5

Module Offering(s)

SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	To provide clinical knowledge and skills that are relevant to the needs of healthcare professionals working with medicines in oncology and to facilitate the professional development of the student, including fostering development of an enquiring, open-minded attitude, tempered with scientific discipline for oncology medicine, which encourages lifelong learning.
------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Gain an understanding of oncology as a discipline and apply knowledge to critically evaluate and reflect on medicines use in cancer care and optimise treatment for patient benefit.
MLO2	2	Assess and manage the particular safety issues and pharmacological care relating to oncology for cancers within their scope of practice
MLO3	3	Demonstrate a commitment to continuing advancement of own and others knowledge and understanding in oncology pharmaceutical care and document continuing professional development in the field.

Module Content

Outline Syllabus	Developmental cancer biology and kinetics with application to practice in oncology and haematology patients. Practicalities around using medicines in oncology and haematology, such as: <ul style="list-style-type: none"> Monitoring patients and prescription review Managing toxicity Symptom control Application of core knowledge of oncology and haematology conditions, their monitoring and the treatment used, including in management of oncologic emergencies. Cancers that may be covered includes: breast, lung, colorectal, skin, lymphoma and leukaemia.
Module Overview	Provides clinical knowledge and skills that are relevant to the needs of healthcare professionals working with medicines in oncology and to facilitate your professional development, including fostering development of an enquiring, open-minded attitude, tempered with scientific discipline for oncology medicine, which encourages lifelong learning.
Additional Information	<p>This module is also offered as a L7 CPD programme (36445) with the following specification: CPD programme to be made available from September 2020. Students may choose to apply for this programme via a number of different pathways:</p> <ul style="list-style-type: none"> Second year optional module of the MSc/PgDip/PgCert Clinical Pharmacy for secondary care (20 credits) Second year optional module of the MSc/PgDip/PgCert Clinical Pharmacy for Primary care and community pharmacy (20 credits) Stand-alone distance learning module (20 credits) <p>The programme has been designed to meet some competencies as detailed in the Expert Professional Practice Curriculum for Cancer Care framework developed by the British Oncology Pharmacy Association (BOPA) and Faculty of Cancer Pharmacy (FCP). The competencies included in the module/programme have been chosen to be suitable for secondary care pharmacists working with oncology patients in a district general hospital Trust or specialist oncology Trust. The programme is delivered completely via blended learning using the online platform Canvas. Every student will be supported by an adequately experienced tutor in the field of oncology. Study mode is part-time blended learning and lasts for 6 months. No attendance is required. Intakes will be available in September and March.</p> <p>Admission criteria: The criteria for admission to the CPD programme are as described above:</p> <ul style="list-style-type: none"> Students entering the programme must be a registered Pharmacist with the relevant professional body in the UK, or with a professional body recognised to be of similar standing to the UK regulator bodies. Where English is not the student's first language, we would normally require a score of 6.5 in the IELTS system (or equivalent), with scores of greater than 5.5 in each of the domains. This is to ensure that the student is able to complete the necessary reading, communication with the programme team and assessments, which must all be completed in English. There may be some exceptions to this requirement if the student is from a majority English speaking country or they have completed studies in English language in the UK or another English speaking country, in which case, a recent high school diploma or equivalent course title may be sufficient. Students must be working in an environment that will provide sufficient access to oncology patients to provide opportunities to develop skills in applying knowledge to real-life cases and collect evidence for the professional practice portfolio. This may include placements, provided that the placement provider can confirm that sufficient access/involvement in care will be possible during the placement and that the placement duration is of sufficient length to allow full development of the relevant skills. The suitability of the access an individual has will be assessed by the programme team prior to admission, but guidance can be obtained prior to application by contacting the programme administrator. <p>Standards: No specific benchmarks are available for this module, but the learning outcomes at least meet, if not exceed, those stipulated in the relevant qualification descriptors for a higher education qualification at level 7 (Master's degree characteristics) as defined by QAA UK Quality code. The LJMU University regulations that the programme(s) will be operating within are written in line with the wider QAA UK Quality Code. The programme(s) have also been designed following consultation with reference to specific aspects of the QAA UK Quality Code: The programme has been written in line with the LJMU Academic Framework (https://www.ljmu.ac.uk/about-us/public-information/academic-quality-and-regulations/academic-framework). The programme has been designed to ensure that learning and assessment are appropriate to a FHEQ Level 7 standard. Learning outcomes are assessed through a number of activities, but these are tailored to maximise the application of knowledge wherever possible and thus require recall and s</p>

Assessments

Assignment Category	Assessment Name	Weight	Exam/Test Length (hours)	Module Learning Outcome Mapping
Report	Patient care plan	60	0	MLO2, MLO3
Reflection	Critical reflection	40	0	MLO1, MLO3
