## Learning Outcomes

After completing the module the student should be able to:

Code	Description
MLO1	Demonstrate, through application in design, an understanding of the social, political and economic context and appropriate theoretical concepts of urban design.
MLO2	Investigate, evaluate and integrate urban design strategies into a design project.
MLO3	Investigate, evaluate and integrate environmental design strategies into a design project.
MLO4	Show the ability to work both within a team to produce a wide range of appropriate communication material.
MLO5	Communicate through a written and fully reference report an understanding of the current planning, social, environmental and economic aspects relevant to the development of urban design.

## Module Content

### Outline Syllabus

A lecture series develops knowledge of urban design theory to an advanced level beyond that acquired in Urban Design Project 1. A workshop abroad or local alternative is organised early in the project, following a period of initial research and analysis. As advanced Masters level work students are self-directed to produce project work in relation to a series of key design review dates established within the module. All the design work is supported by a structured series of tutorials and seminars. A period of time is allocated for the completion of the Project Report in the later stages of the module.

### Module Overview

#### Additional Information

Welcome to the group Urban Design module, in this course you will develop ideas suggested in 7211MAR and expand them into a comprehensive Urban Design strategy for a transect of the city. Your Urban Designs will go onto to provide the context for your thesis research and eventual project design drawing together the various strands of Architecture into a wider thesis year.
