

Summary Information

Module Code	7432BEPG
Formal Module Title	Construction Contract Strategy
Owning School	Civil Engineering and Built Environment
Career	Postgraduate Taught
Credits	20
Academic level	FHEQ Level 7
Grading Schema	50

Teaching Responsibility

LJMU Schools involved in Delivery
Civil Engineering and Built Environment

Learning Methods

Learning Method Type	Hours
Lecture	11
Workshop	22

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	To develop a strategic knowledge and critical appreciation of construction contract law to enable the student to consider in detail the application of it to construction and engineering projects.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Discuss and apply the principles of contract law as it affects construction and engineering projects.
MLO2	2	Evaluate and assess the obligations of the contracting parties within a range of standard form construction contracts.
MLO3	3	Critically evaluate construction contracts in terms of strategic contract decisions and options.
MLO4	4	Critically debate the application of construction contract law in regard to specific construction project risks.

Module Content

Outline Syllabus	The outline syllabus for the module will be based on the JCT SBC however extensive reference will be made to other standard forms and include the following topics:1. Introduction to the Law and the English Legal System. 2. Introduction to principles and doctrines of Contract Law.3. Scope and nature of a construction contract4. Use of contract strategy to manage risk specifically in relation toa. Insuranceb. Collateral Warrantiesc. Excluding and Limiting conditions of contract.d. Amendments made to standard formse. Assignment and sub-letting.8. Review New Engineering Contract, CIOB Complex Projects Contract, and FIDIC.9. Alternative dispute Resolution – Arbitration, Statutory Adjudication, Mediation etc.10. Litigation and the Pre-Action Protocols.
Module Overview	This module develops a strategic knowledge and critical appreciation of construction contract law to enable you to consider, in depth, its application to construction and engineering projects.
Additional Information	Timetabled sessions are only a part of how you will learn on the module. A large part of what it means to study and learn at University is based on directed independent learning outside formal classes. This independent study is just as important as timetabled sessions and may involve you in extra reading, research, task development, group work, keeping up to date with current events related to your subject.

Assessments

Assignment Category	Assessment Name	Weight	Exam/Test Length (hours)	Module Learning Outcome Mapping
Portfolio	Report	50	0	MLO1, MLO2, MLO3, MLO4
Centralised Exam	Examination	50	3	MLO1, MLO2, MLO3, MLO4
