SEP-PAR	PAR	September	12 Weeks

Aims and Outcomes

Aims	To provide the student with the necessary knowledge and insight to ensure a coordinated approach to the management of patients/clients with a long term condition.
------	--

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Demonstrate critical knowledge of the physical, psychological behavioural and socio economic impact of living well with a long term condition and multi-morbidity with specific focus on common clusters of conditions
MLO2	2	Critically discuss the national and international policy context for people with long term conditions whilst tailoring local services and interventions to meet the personal outcomes of the individual
MLO3	3	Critically explore the barriers to multi-disciplinary, inter-agency and partnership working in the management of long-term conditions, and synthesise possible solutions

Module Content

Outline Syllabus	Aetiology and diagnosis of long term conditions, pathophysiology of long term conditions, complications related to long term conditions, multi-morbidity, pharmacology related to long term conditions, prevention of long term conditions. Rehabilitation, NICE guidance, Self care, promoting independence, empowerment, health literacy and the Expert Patient. End stage complications, Palliative care, Partnership working, shared care arrangements, admission avoidance, legalities involved in Long term Conditions, psychological care, diversity.
Module Overview	
Additional Information	Engagement in this module will focus on the approaches to providing nursing care for patients with long term conditions whilst advancing your understanding of person-centred approaches to improving services for people with multiple conditions globally, as identified in national and international policy. The topic must be agreed with the tutor beforehand, and must be relevant to nursing.
