Aims and Outcomes

Aims	This module aims to provide students with a broad introduction to the role played by the 'City of London' in the development of financial services 'products'. This module has been designed to support both those with, and those without, a legal background. The overall purpose is for all students to understand the basic principles of legislation, regulation and compliance in the financial services industry, with the module embedding skills to support getting to grips with the legal language, workings and particulars that underpin the programme. The assessments have been designed specifically to enable non-lawyer/legal background students to gain a firm understanding of legal writing, including syllogistic reasoning. Furthermore, this will ensure that lawyers/legal background students entering the course are refreshed in academic rigour, and stretched/challenged, in preparation to work as masters (FHEQ 7) level.
------	--

After completing the module the student should be able to:
